Subject: Punishment -> Marketting Opportunity for M\$?

The proposed settlement has turned what should have been a punishment into a marketting opportunity. A Billion dollars worth of Software, which it will cost them maybe a *MILLION* dollars to actually *MAKE*, and you are taking their stuff and GIVING it to the next generation, like a hit of crack.

The marketting guyz in Redmond must be absolutely rolling in the isles.

I am disgusted.

Aloha mai Nai`a.
